

Indoor growing made simple.

INCREASE YOUR HARVEST YIELD FOR FALL 2021!

INTRODUCING THE HARVEST WALL

Unique stand-alone scalable grow wall with adaptability to interconnect.

Double sided
576 grow ports

What is Vertigation™?

An integrated irrigation system designed for vertical distribution of water and nutrients to all grow ports in a Harvest Wall.

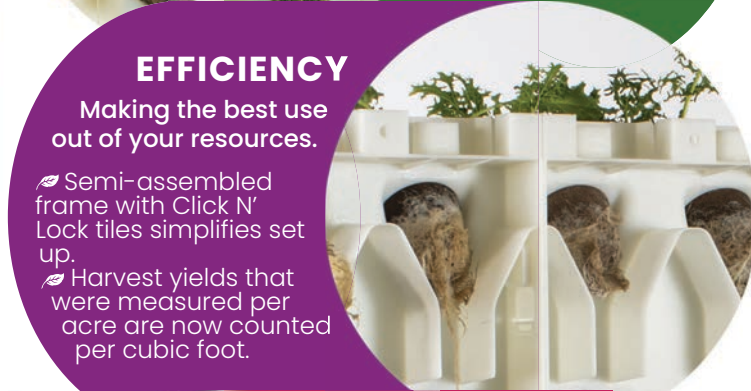

Harvest Today designs innovative and efficient technology that make sustainable, locally grown food a reality from the arctic to the equator. Harvest Walls make nutrient-dense food accessible by providing simple growing equipment to urban and rural farmers, commercial growers, and the hospitality & institutional industry.

ECONOMICS

Harvest Walls grow green and save green.

- Scalable design creates future flexibility and crop diversity.
- Compelling ROI on initial capital investment when compared to popular grow walls.

EFFICIENCY

Making the best use out of your resources.

- Semi-assembled frame with Click N' Lock tiles simplifies set up.
- Harvest yields that were measured per acre are now counted per cubic foot.

EASE OF USE

Freeing you up to focus on what you do best.

- Irrigation frequency and duration controlled on the Harvest Today App.
- Integrated Vertigation system provides reproducible harvest results by ensuring every plant is watered every time.
